As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

I'd also like to add, that at the age of 35 I developed breast cancer. I truly believe that the majority of cancers are a result of pesticides in our food, irradiation of our food and many other health problems are a result of antibiotics being fed to animals. I do not let my children eat poultry that is injected with antibiotics. Please help ban the use of antibiotics. It's a start.  
Jane Schloss
